Profile

Frontend Engineer with 3+ years of experience building modern, scalable web applications using Vue.js, Nuxt.js, TypeScript, and JavaScript. Experienced in developing responsive, high-performance user interfaces, integrating REST APIs, and building reusable component-based architectures for production applications.

Passionate about writing clean, maintainable code and creating intuitive user experiences. Strong focus on TypeScript, frontend architecture, performance optimization, and modern development practices. Experienced in leveraging AI-powered development tools, including Cursor, to accelerate development, improve code quality, and streamline engineering workflows.

Professional Experience

NFSC, Frontend Engineer

10/2025 – Present

- Developed and maintained scalable frontend applications using Vue.js, React, and TypeScript.
- Built reusable, responsive UI components to improve consistency and development efficiency.
- Integrated frontend applications with REST APIs and backend services.
- Collaborated with designers, backend engineers, and QA teams to deliver high-quality features.
- Participated in code reviews and followed modern frontend best practices to ensure maintainable and reliable code.
- Contributed to multiple projects supporting digital transformation initiatives in Saudi Arabia's real estate sector.

ZAT, Nuxt Frontend Developer

01/2024 – 10/2025

- Developed a web platform for one of the largest Baloot gaming communities in Saudi Arabia.
- Built features for managing championships, teams, players, and tournament schedules.
- Implemented tournament coverage with match scores, standings, and statistics.
- Developed an interactive match prediction system to increase community engagement.
- Integrated the frontend with backend APIs to synchronize tournament, player, and match data across the platform.

Qydha, Nuxt frontend Develoepr

06/2023 – 01/2024

- Designed and developed a modern **landing page** using **Nuxt**, focusing on performance, SEO, and responsive design.
- Created a **dashboard system** to control backend operations and manage data flow between the system and a **mobile application**.
- Integrated REST APIs to display real-time data and manage user input effectively.
- Collaborated closely with backend teams to ensure smooth data communication and system reliability.
- Implemented reusable components and clean architecture to enhance maintainability.
- Built a tournament management system for a competitive card game, integrating web, mobile, and backend services to provide real-time match tracking, synchronize tournament data, and manage match workflows from scheduling to completion.
- Built a streaming platform for content creators that enables live broadcasting of gameplay with real-time match scores and statistics synchronized from tournament data.

NSPO, Backend Developer

2022 – 2023 | Cairo, Egypt

- Developed and maintained backend services for a **construction project management system** using **Django**.
- Designed and implemented RESTful APIs for managing projects, tasks, user roles, timelines, and resources.
- Built secure authentication and role-based access control to support different user.
- Worked closely with frontend and mobile developers to ensure seamless integration and consistent data flow across platforms.

Arab Organizer, IT Assistant

2020 – 2021 | Cairo, Egypt

- Provided **technical support** for systems used to organize and manage **medical conferences**, both onsite and remotely.
- Assisted in setting up and maintaining conference equipment, including computers, projectors, and networking devices.
- Supported the software systems used for **registration, scheduling, and speaker management**.
- Handled troubleshooting of technical issues during live events to ensure smooth operations.
- Coordinated with vendors and internal teams to ensure reliable IT infrastructure before and during events.

Education

Bachelor's degree In Computer Science,
Menoufia University

2018 – 2022 | Shben Elkom, EGYPT
